

LoanCart – Smart Loan Management System

Project Report

Author: Shashwat Shukla

Date: 21st September 2025

Introduction

LoanCart is a comprehensive web-based platform designed to revolutionise loan management processes. The system bridges the gap between borrowers and administrators through an intuitive digital interface.

Supporting dual-role functionality, the platform caters to both end-users seeking loans and administrators managing the approval workflow, creating a seamless lending ecosystem.

Manage Your Loans

Loan ID	Type	Amount	EMI	Status	Next Payment	Actions
6898a11255b059c07a0e5	Home	₹56445	₹1,025.14	approved	Dec 15, 2024	Pay Now
6898a61255b059c07a0e6	Education	₹5466	₹3636.99	rejected	-	Pending
689d24d031109c490c8052	Personal	₹1000	₹41.67	approved	Dec 15, 2024	Pay Now

Payment History

Date	Loan ID	Amount	Status
Nov 15, 2024	LN001	₹1,800	Paid
Nov 20, 2024	LN002	₹550	Paid
Oct 15, 2024	LN001	₹1,800	Paid

Project Objectives

Streamline Operations

Simplify complex loan management processes for both users and administrators through automated workflows and intuitive interfaces.

Enhanced Security

Provide a secure, user-friendly interface with robust authentication and data protection measures throughout the platform.

Smart Automation

Automate loan approval processes and implement comprehensive payment tracking systems to reduce manual intervention.

Technology Stack

Frontend Technologies

- HTML5 for semantic structure
- CSS3 for responsive styling
- JavaScript for dynamic interactions

Backend & Database

- PHP for server-side processing
- MongoDB for flexible data storage
- Composer for dependency management

System Architecture

Frontend Layer

User interacts with responsive HTML/CSS/JavaScript interface providing seamless user experience across devices.

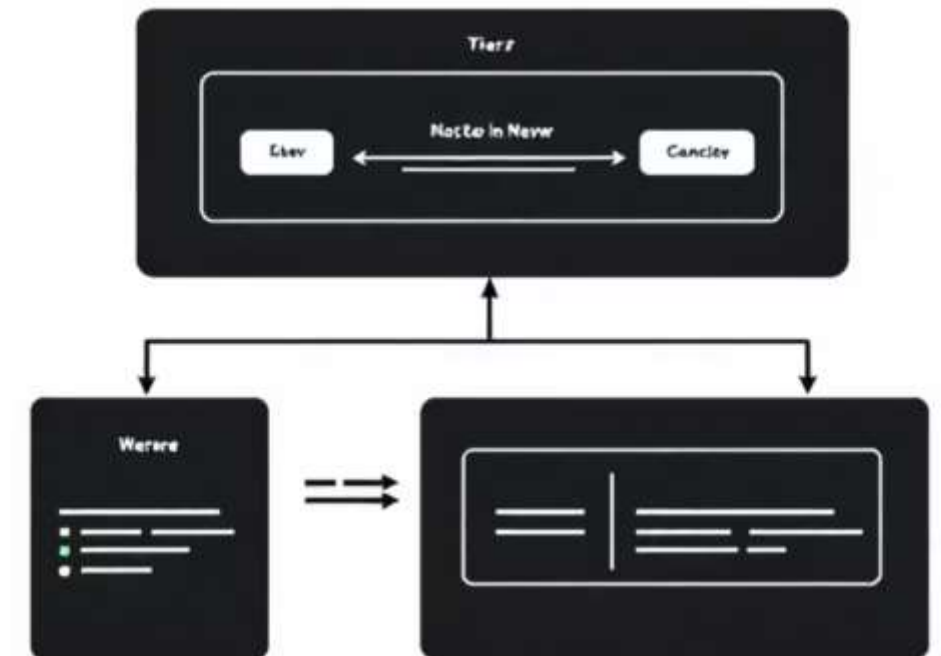

Backend API

PHP backend processes requests, handles business logic, and manages secure communication between frontend and database.

Data Layer

MongoDB provides flexible, scalable data storage with efficient querying capabilities for loan and user information.

Core System Features

01

User Authentication

Secure registration and login system with role-based access control ensuring data privacy and system integrity.

02

Profile Management

Comprehensive user profile system allowing customers to maintain personal information and track their lending history.

03

Loan Processing

Streamlined application workflow with real-time status tracking and automated notification systems for applicants.

04

Administrative Dashboard

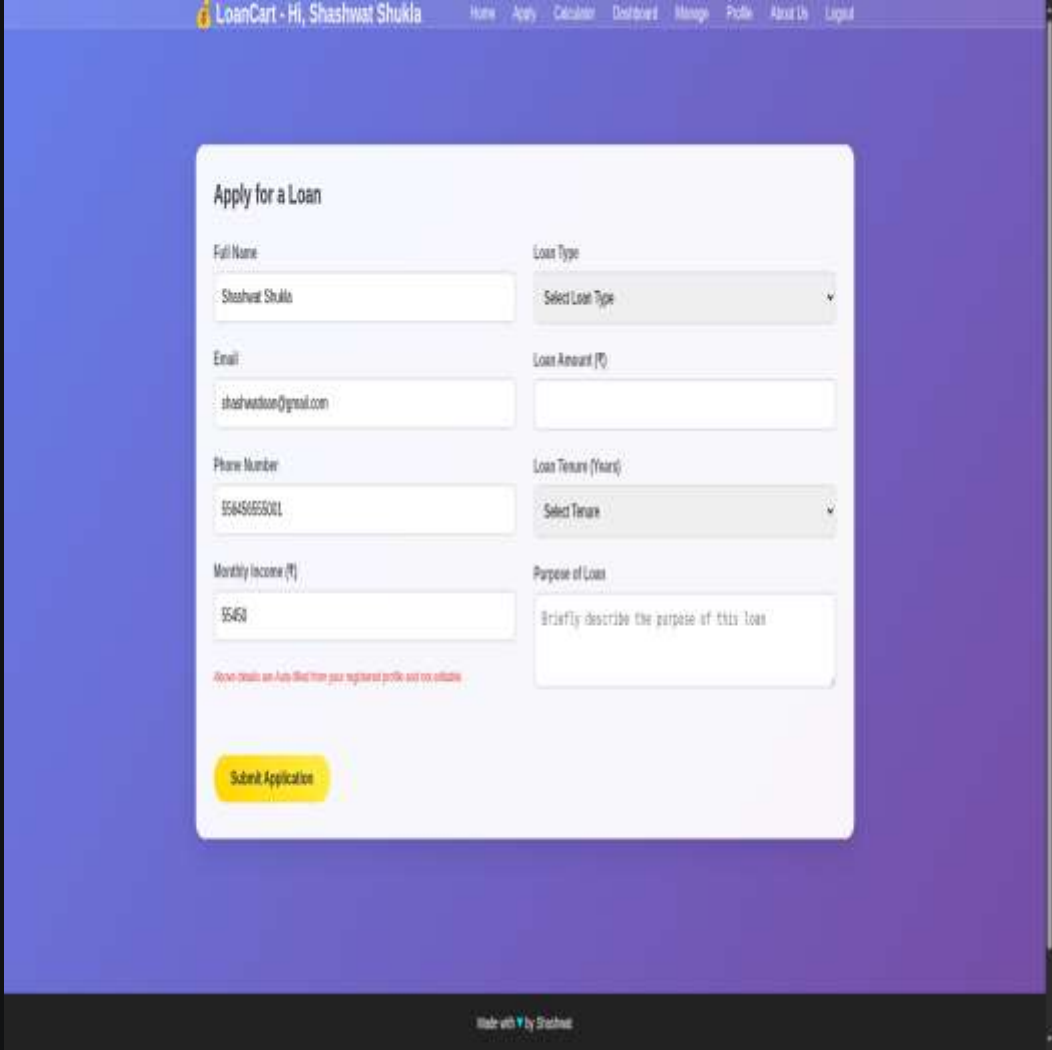

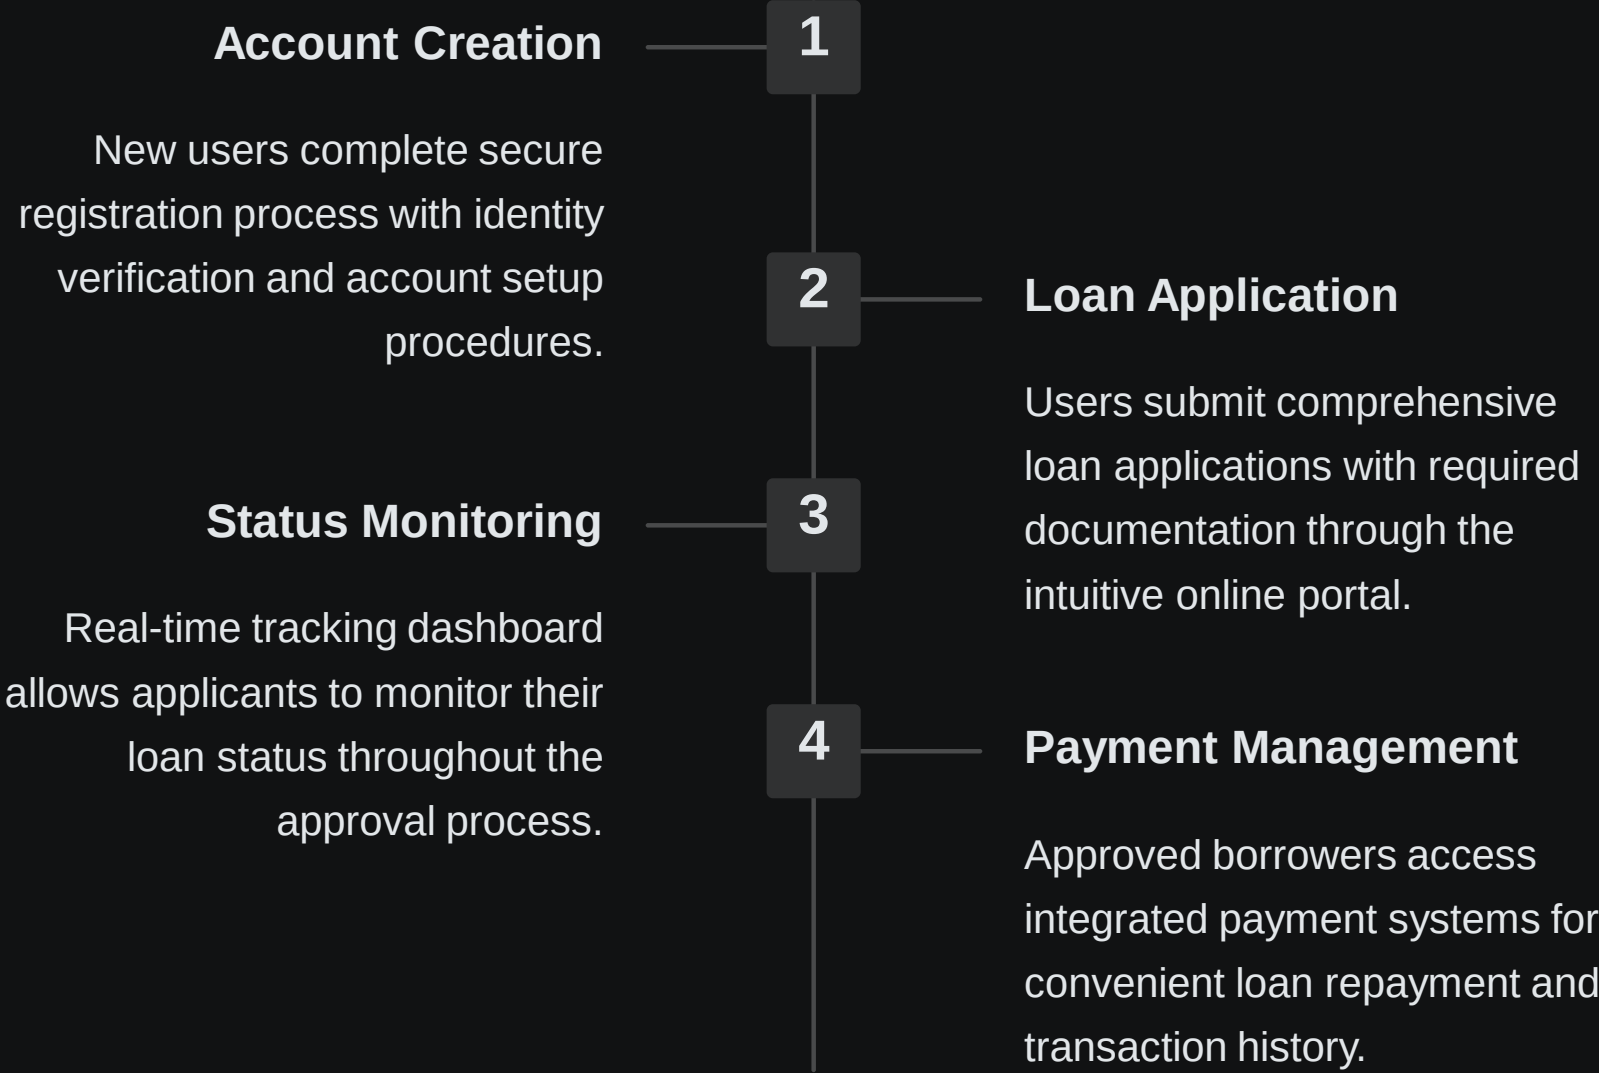

Powerful admin interface for reviewing applications, making approval decisions, and monitoring overall system performance.

05

Payment Integration

Complete payment management system with transaction history, automated reminders, and comprehensive financial tracking.

User Journey Workflow

Payment History			
Date	Loan ID	Amount	Status
Nov 15, 2024	LN001	₹1,800	Full
Nov 28, 2024	LN002	₹500	Full
Oct 15, 2024	LN001	₹1,800	Full

Administrative Control Centre

1 Secure Admin Access

Administrators access the system through enhanced security protocols with multi-level authentication and audit trails.

2 Application Review Process

Comprehensive review interface displaying pending applications with detailed applicant information and risk assessment tools.

3 Decision Management

Streamlined approval and rejection workflow with customisable criteria, automated notifications, and decision documentation.

4 System Monitoring

Advanced analytics dashboard for tracking payment activities, user engagement metrics, and overall system performance indicators.

Database Architecture

MongoDB Collections

Users Collection

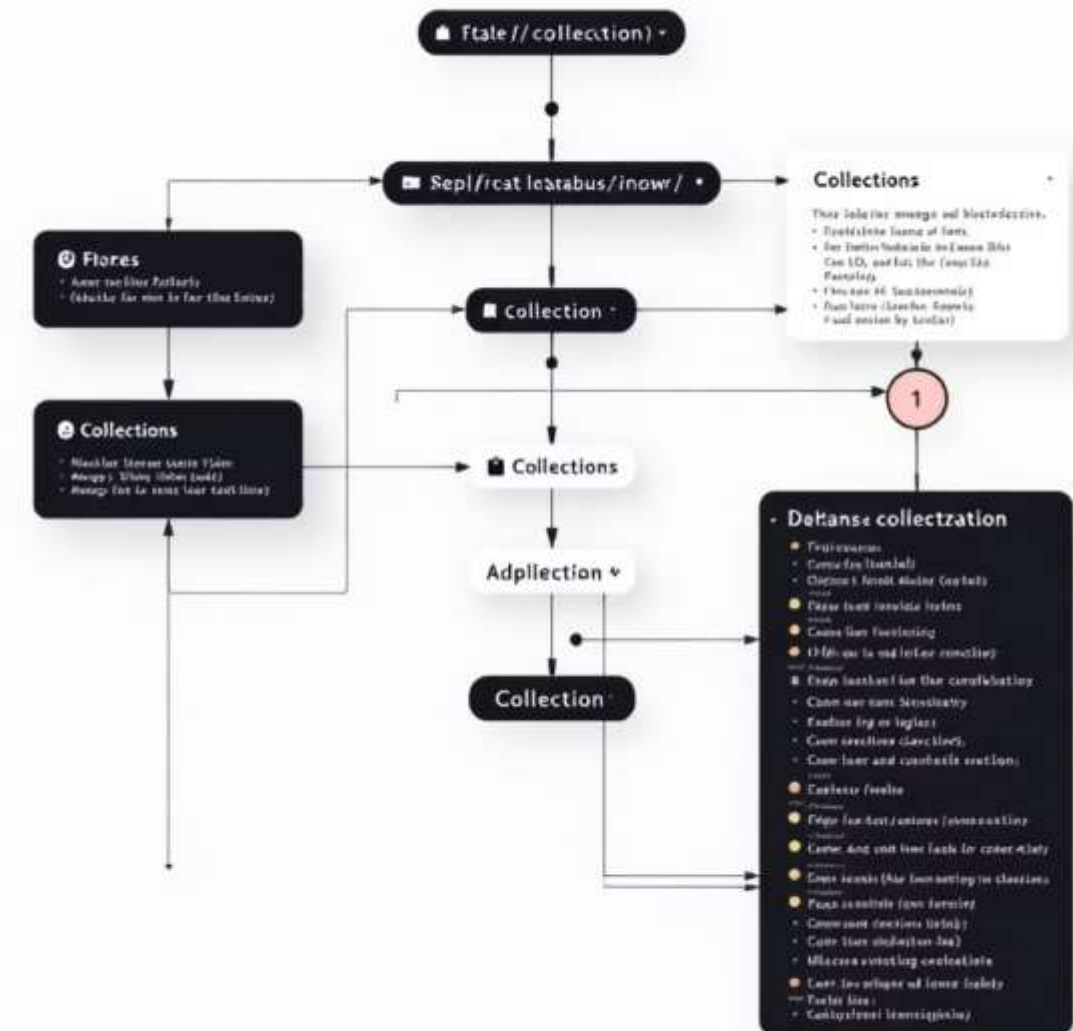

Stores comprehensive user profiles, authentication credentials, and personal information with encrypted security measures.

Loans Collection

Manages loan applications, approval status, terms, conditions, and complete application lifecycle tracking.

Payments Collection

Records payment transactions, schedules, history, and maintains comprehensive financial audit trails.

Key Advantages: Flexible NoSQL schema allows seamless updates and scalability as business requirements evolve.

API Endpoints & Backend Services

apply-loan.php

Processes new loan applications with validation, document handling, and automated workflow initiation.

admin-approve-loan.php

Enables administrators to approve loan applications with automated notification systems and status updates.

admin-reject-loan.php

Handles loan rejections with reason logging and automated applicant communication protocols.

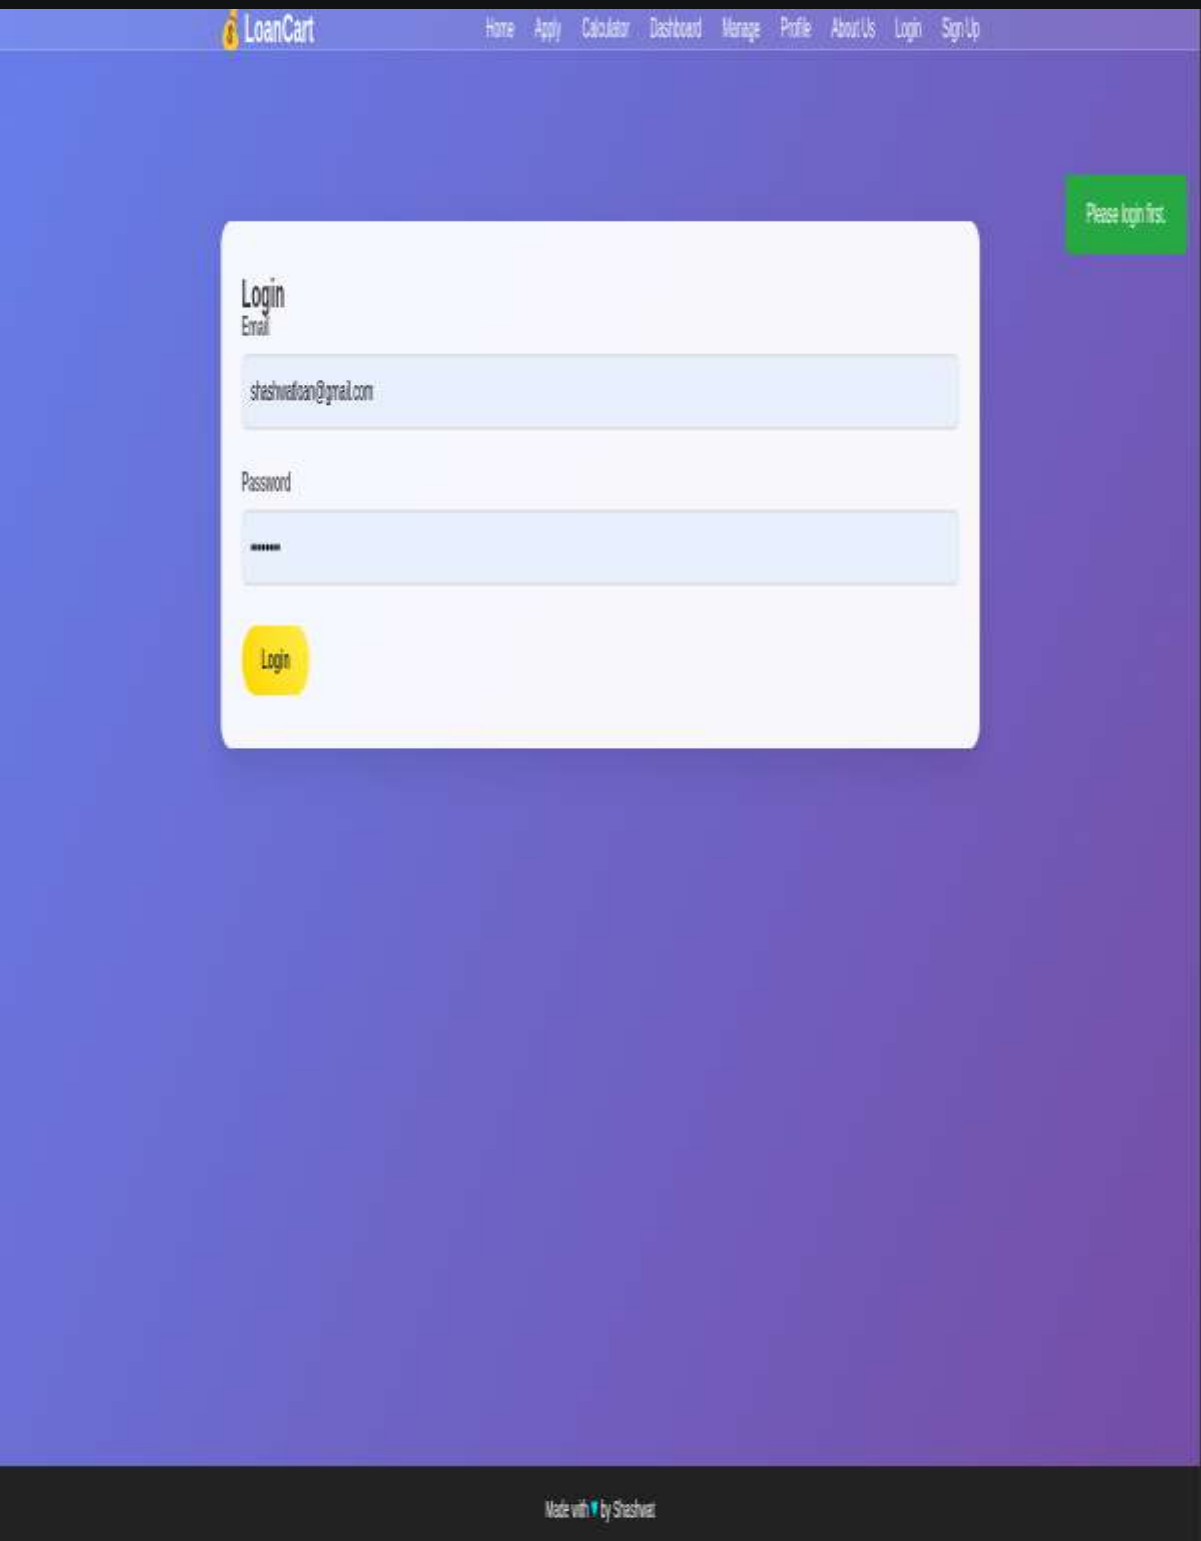

make-payment.php

Processes secure payment transactions with validation, receipt generation, and account balance updates.

get-dashboard.php

Delivers personalised dashboard data with real-time statistics, notifications, and user-specific information.

User login page – Secure access for users and administrators.

1

Secure User Access

Users access the system through enhanced security protocols with multi-level authentication and audit trails.

2

User-Friendly

Simple interface for easy and quick access.

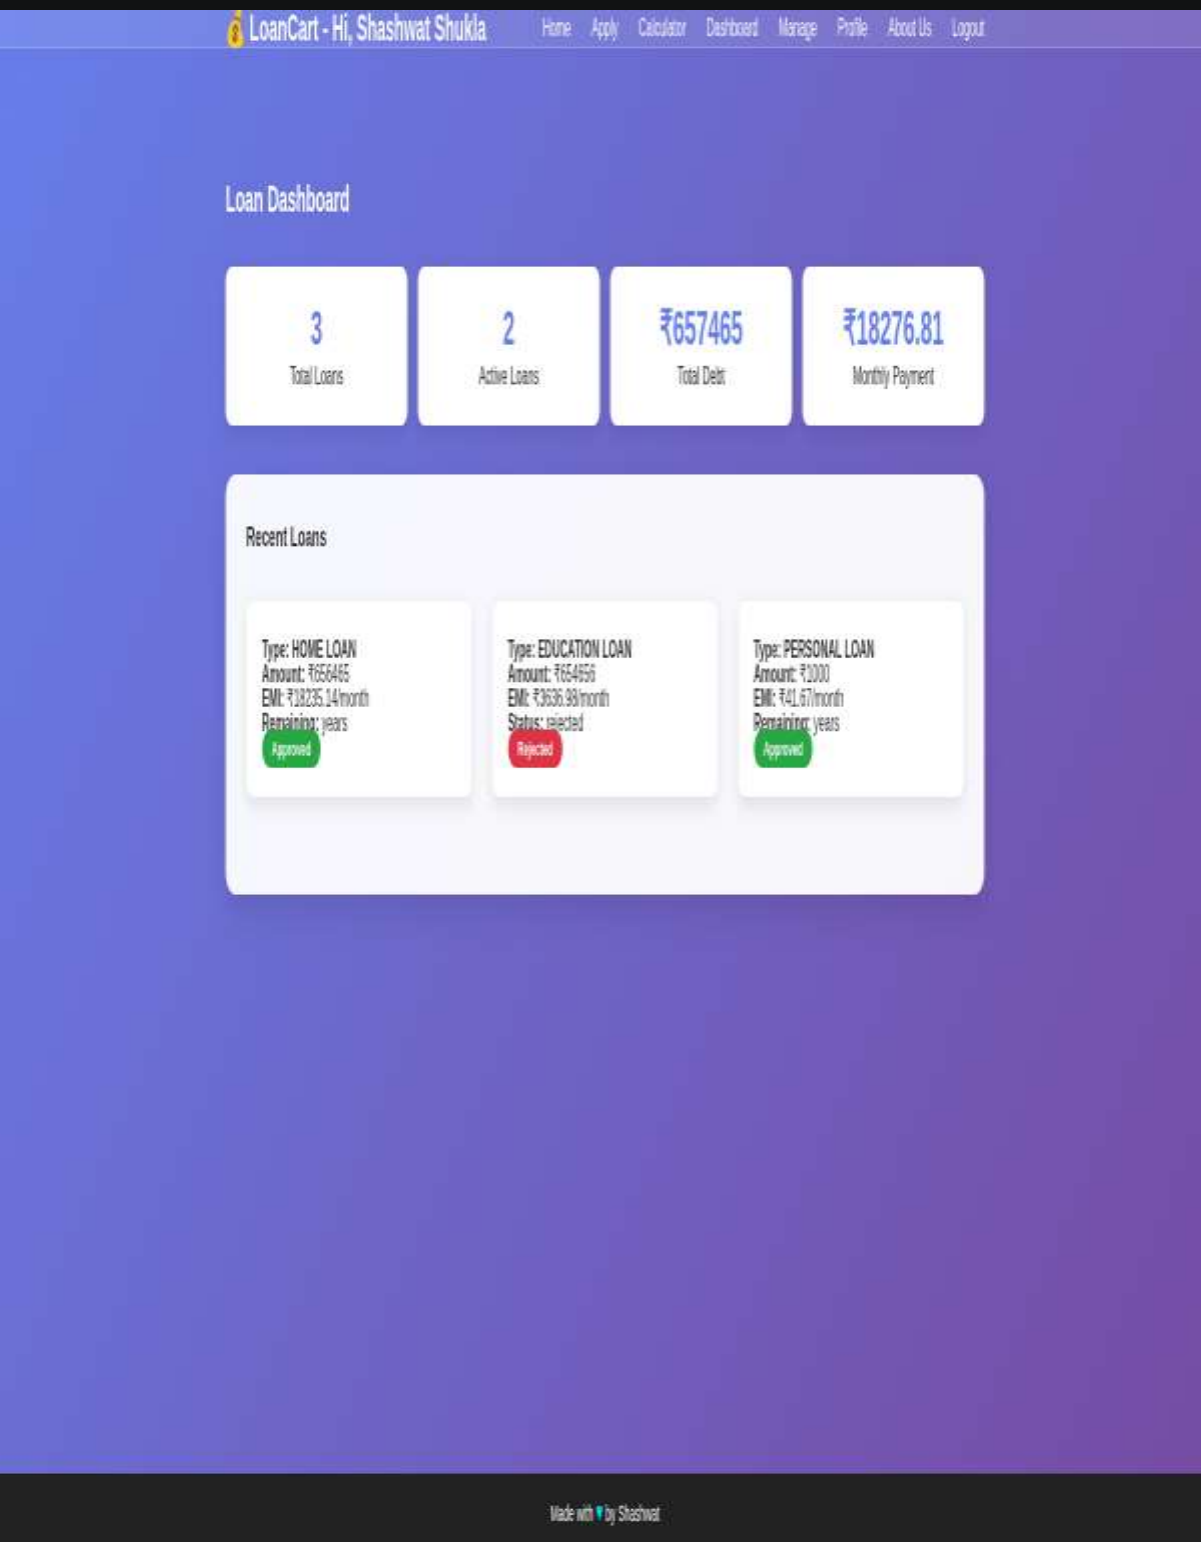

3

Restricted Entry

Ensures only authorized users and admins can log in.

System Monitoring

Advanced analytics dashboard for tracking payment activities, user engagement metrics, and overall system performance indicators.

User dashboard – Overview of loan status and available actions.

1

Quick navigation

User dashboard displaying loan status and quick navigation options.

2

Central Hub

Users can view loan status, payments, and profile from one place.

3

Real-Time Updates

Displays personalized and up-to-date information.

4

System Monitoring

Advanced analytics dashboard for tracking payment activities, user engagement metrics, and overall system performance indicators.

User Loan Management

1

Status Overview

Shows the current state of each loan application.

2

Transparency

Users can see if their application is approved, rejected, or pending.

3

User Awareness

Keeps applicants informed throughout the process.

Loan Calculator

Loan Amount (₹)

Interest Rate (% per year)

Loan Tenure (Years)

Calculate

Loan Details

Monthly EMI: ₹11025.83
Total Interest: ₹11549.59
Total Amount: ₹61549.59

EMI Calculator

1 Loan Calculation Form

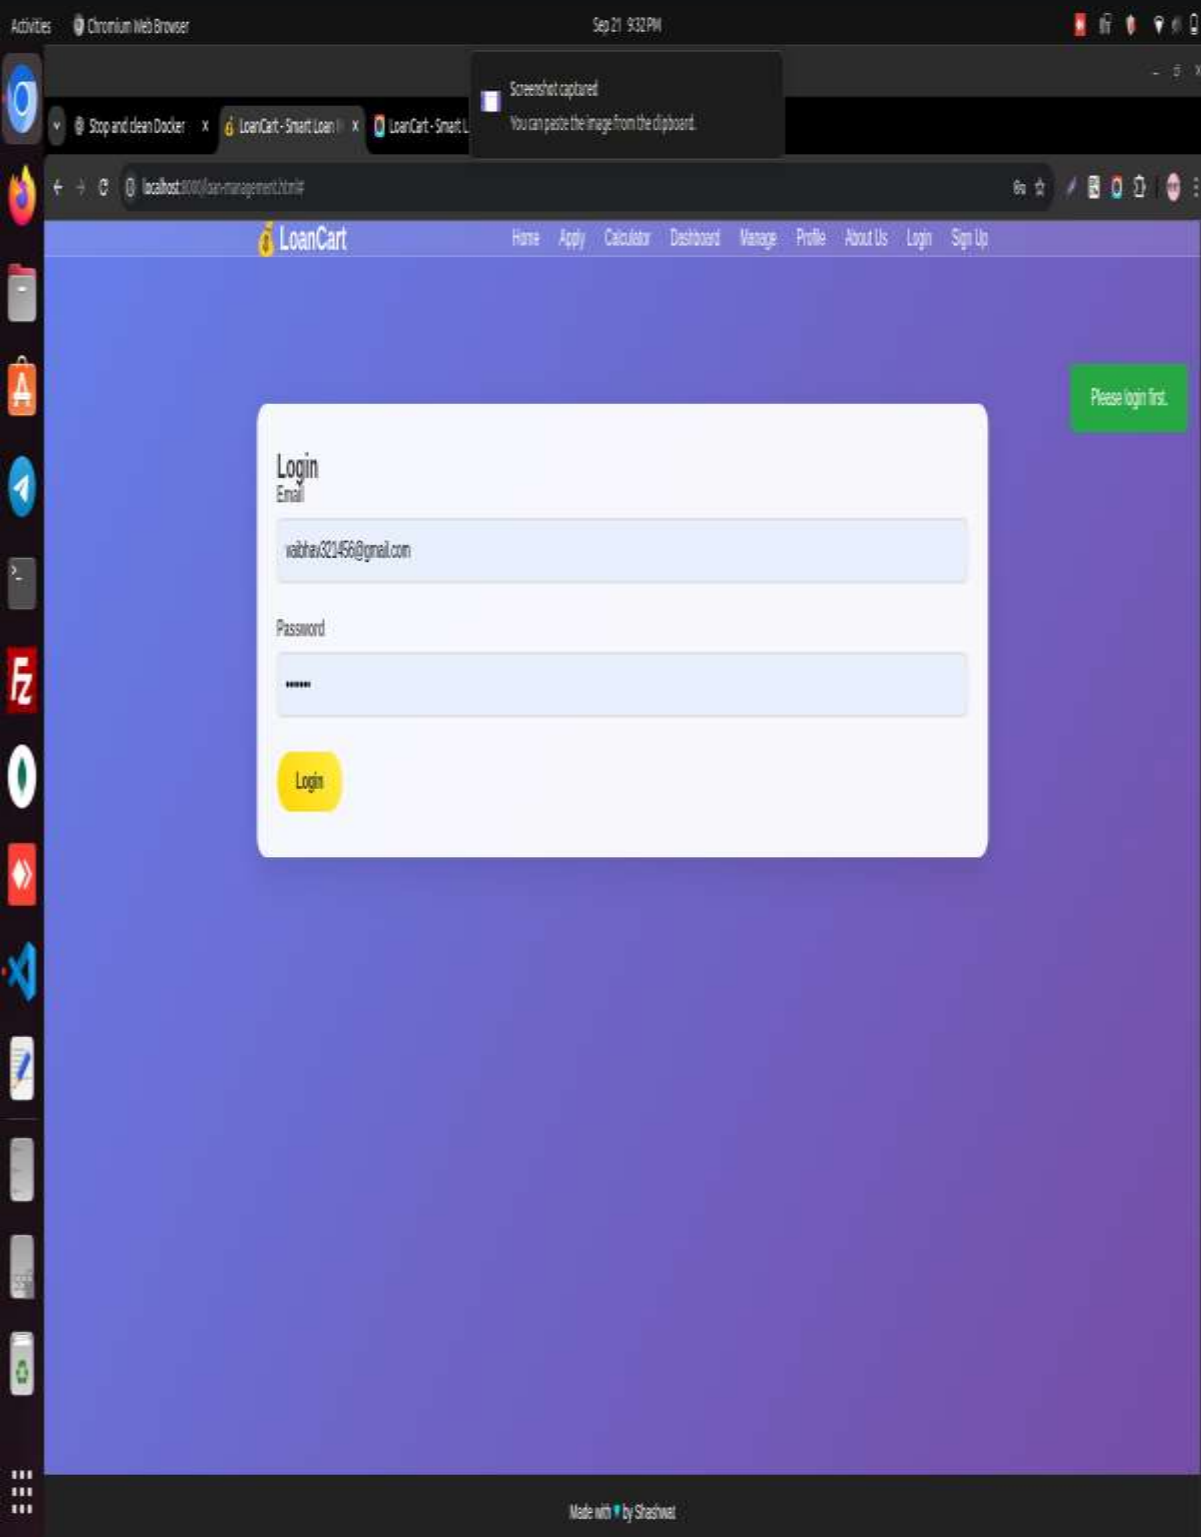

Users can input the loan amount, interest rate, and tenure to calculate their monthly EMI and total repayment.

2 Instant Results

The right panel displays the calculated Monthly EMI, Total Interest, and Total Amount instantly after clicking "Calculate".

3 User-Friendly Design

Clean and intuitive interface ensures easy navigation and quick financial planning for all users.

Secure Logout

1

Status Overview

Confirms session end for user safety.

2

Access Control

Prevents unauthorized use after logout.

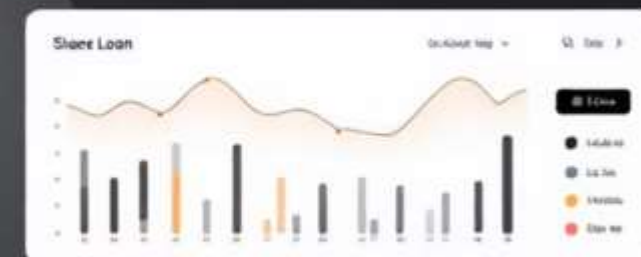

3

Best Practices

Reinforces good security habits for all users.

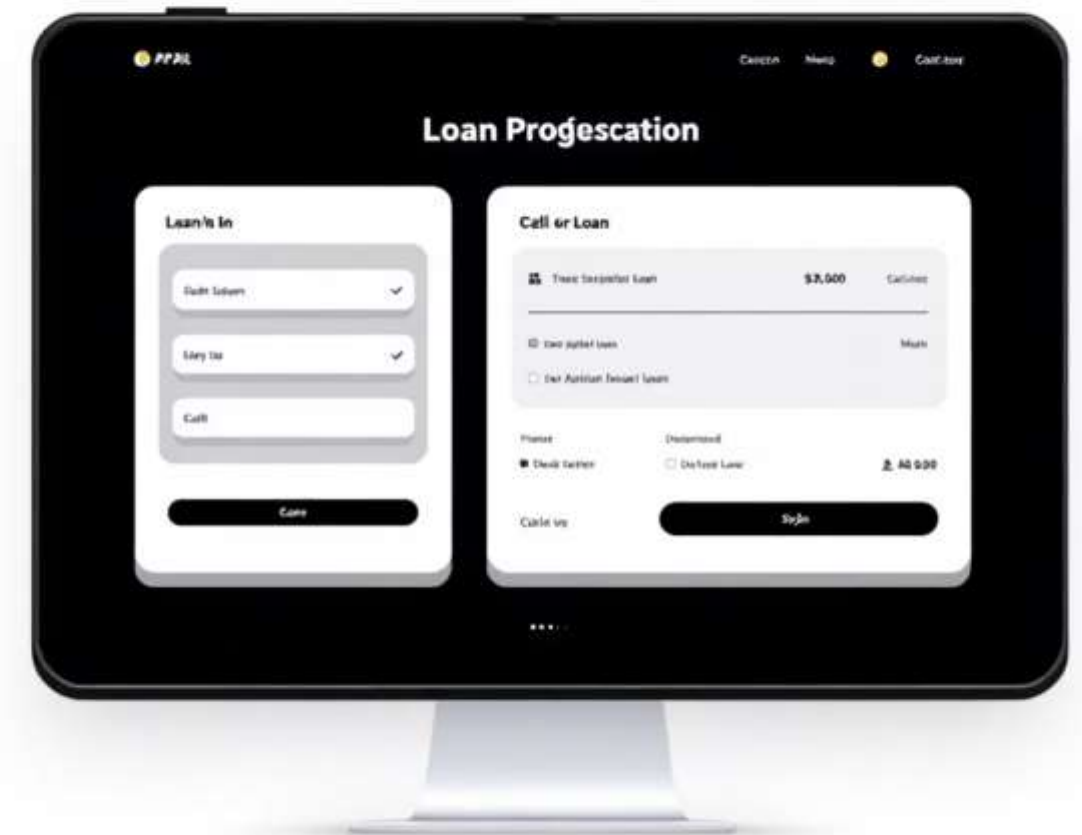

Setup and Installation Process

LoanCart delivers a secure, scalable solution for loan management, simplifying processes for users and administrators and supporting future development opportunities. Setup involves composer initialization, installing PHP MongoDB extension, starting services, and accessing via local server with provided admin credentials.

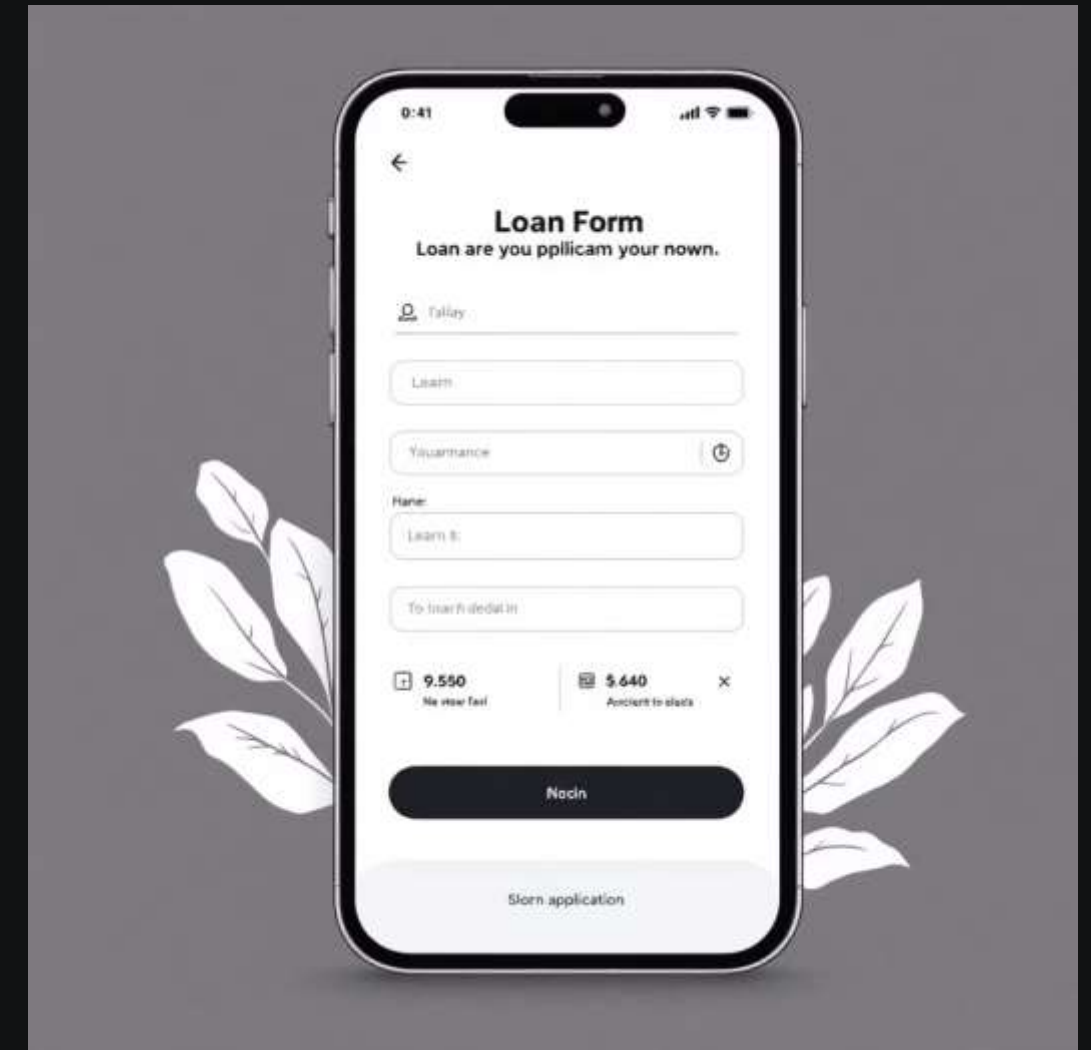

Challenges Faced and Solutions

Key challenges were integrating MongoDB with PHP, ensuring secure authentication, and designing a user-friendly interface; each was addressed with targeted solutions.

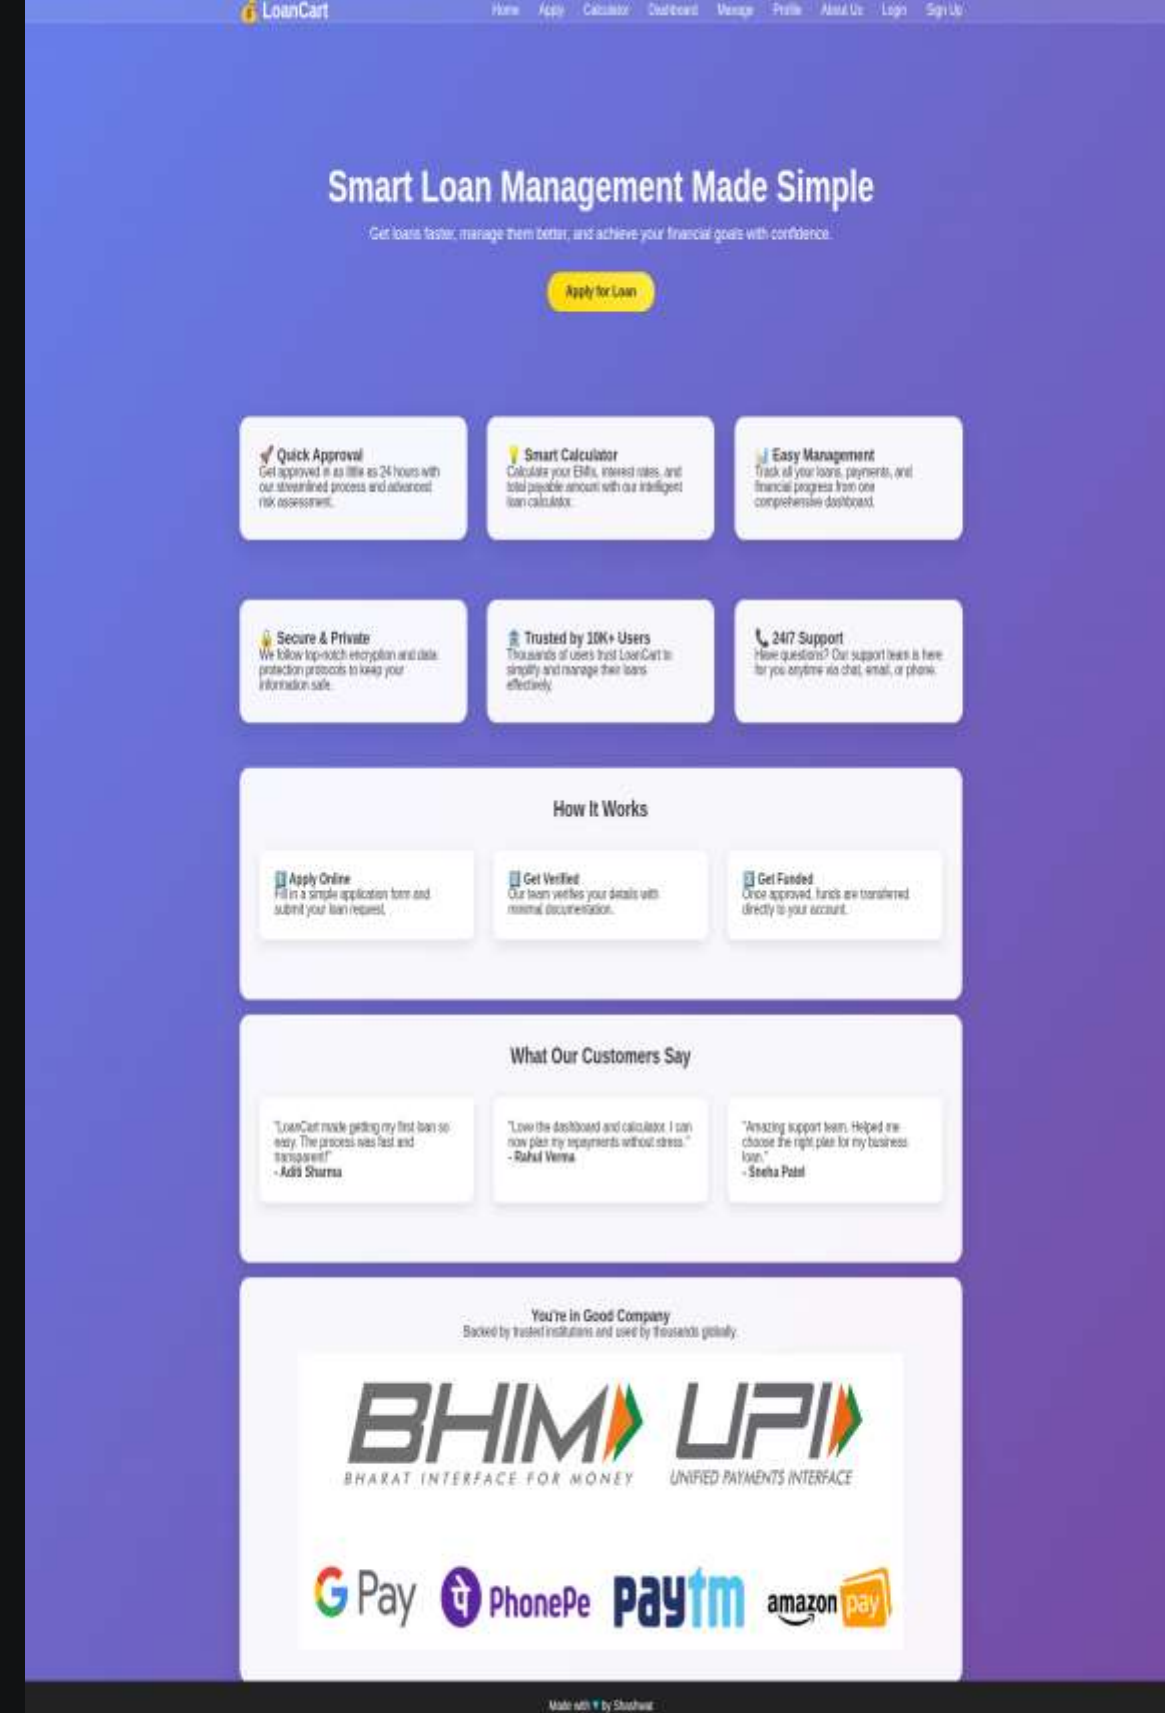

Future Enhancements and Scalability

Plans include adding email/SMS notifications, loan analytics, a mobile app version, and enhanced security measures for scalability and improved user experience.

Conclusion

LoanCart delivers a secure, scalable solution for loan management, simplifying processes for users and administrators and supporting future development opportunities.

About the Developer

Shashwat Shukla

BCA Student | Full Stack Enthusiast | Creator of LoanCart

Hi, I'm Shashwat — a passionate tech learner and developer who thrives on solving real-world problems through smart, user-centric digital solutions. As a BCA student, I've always believed in learning by doing.

LoanCart is a personal initiative born out of the idea to make loan management simple, transparent, and stress-free. It's more than a project — it's a reflection of my journey in tech, product design, and customer-first thinking.

Whether it's applying for a loan, calculating EMIs, or tracking your credit and repayments — LoanCart brings it all together in one seamless experience.

Thanks for stopping by. Your feedback and support help me grow, learn, and build better every day!
